PROFESSIONAL SUMMARY

AI & Data Science student skilled in Java, Python, HTML, CSS, JavaScript, SQL, and SDLC practices. Experienced in designing, developing, testing, and troubleshooting applications for improved performance and scalability. Proficient in analyzing issues, optimizing code, and supporting cloud-ready and AI-driven solutions. Strong communicator with solid problem-solving and teamwork abilities, aiming to contribute effectively as an Associate Software Engineer.

EDUCATION

Bachelor of Technology (B.Tech) – Artificial Intelligence & Data Science

Aug 2022 – Jan 2026

NBKR Institute of Science and Technology (96%)

Senior Secondary (Class XII)

March 2022

Krishna Chaitanya Junior College (96%)

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, C, JavaScript, Object-Oriented Programming (OOP), Data Structures and Algorithm
- **Web Technologies:** HTML, CSS, Javascript, Bootstrap, Tkinter, React.js, Node.js, Express.js
- **Databases:** SQL, MySQL, MongoDB
- **Version Control:** Git, GitHub
- **Libraries / Frameworks:** React.js, Node.js, Express.js Bootstrap, Tkinter, OpenAI APIs
- **Core Competencies:** Analytical Problem-Solving, Troubleshooting, Code Optimization, Technical Documentation
- **Soft Skills:** Problem-Solving, Communication, Time Management, Team Collaboration, Decision Making

EXPERIENCE

Web Developer Intern | Cognifyz Technologies

Apr 2024 - Sept 2024

- Developed and optimized responsive web pages using HTML, CSS, JavaScript, and Bootstrap, improving load performance by 30% and enhancing cross-device usability.
- Debugged and refined UI components, resolving front-end issues and increasing overall interface stability and user experience by 25%.

PROJECTS

Restaurant Billing System – Python, Tkinter

GitHub: [Restaurant Billing System Project-link](#)

- Engineered a Restaurant Billing System using Python and Tkinter, automating cost, tax, and total calculations, which reduced manual errors by 95% and improved billing speed by 40%.
- Designed an intuitive GUI to streamline restaurant operations and enhance user productivity.
- Executed full SDLC activities—requirements gathering, UI flow design, feature implementation, and unit testing—to ensure reliability and maintainability.

Gemini AI Clone – React, Tailwind CSS, OpenAI API

GitHub: [Gemini API Clone project](#)

- Developed an AI-driven conversational application, Gemini AI Clone, leveraging React, Tailwind CSS, and OpenAI API, enhancing response accuracy and consistency by 30% through real-time context-aware responses.
- Implemented chat history, dynamic rendering, and optimized state management to enhance interaction smoothness and front-end responsiveness by 25%.
- Applied SDLC practices including architectural planning, API integration, debugging, and performance optimization.

Face Recognition Attendance System – Python, OpenCV

GitHub: [Attendance with face recognition model](#)

- Built a real-time Face Recognition Attendance System with Python and OpenCV, achieving 90% identification accuracy and automating attendance logging, thereby reducing manual entry time by 80%.
- Automated attendance logging (name, date, timestamp), reducing manual entry time by 80% and improving overall record accuracy.
- Performed data preprocessing, model tuning, feature development, and live testing to ensure efficient and reliable performance.

CERTIFICATIONS

- Artificial Intelligence Fundamentals – IBM SkillsBuild August 2025
- Python Programming Hackathon – CODTECH IT SOLUTIONS March 2025
- Frontend Web Development Bootcamp – Smarted Innovations in collaboration with Skill India and NSDC June 2025
- Introduction to Industry 4.0 and Internet of Things – NPTEL July 2025

ACHIEVEMENTS

- Certificate of Merit – Naukri Campus Young Turks 2025
Secured 97.64 percentile in a national skill contest recognizing high-performing engineering students across India.
